JOIN THE MOVEMENT

Reflections on LSTF tranche 1 funding round

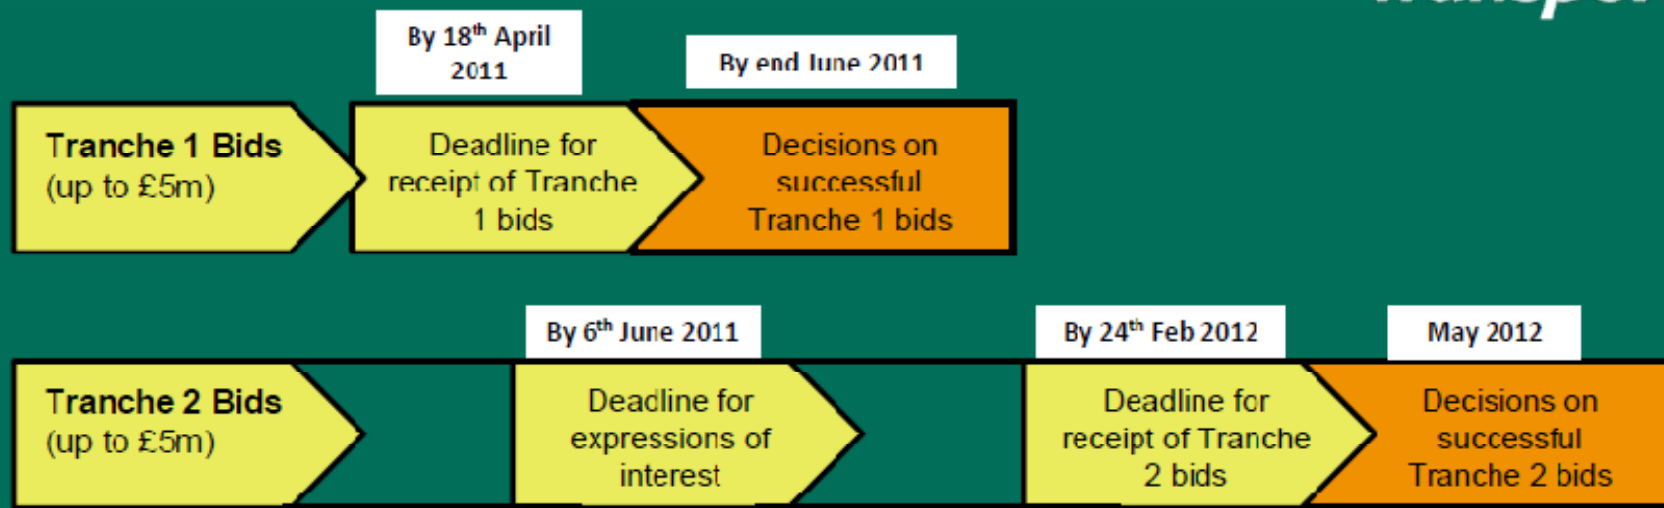

Andy Cope

Director of Research and
Monitoring

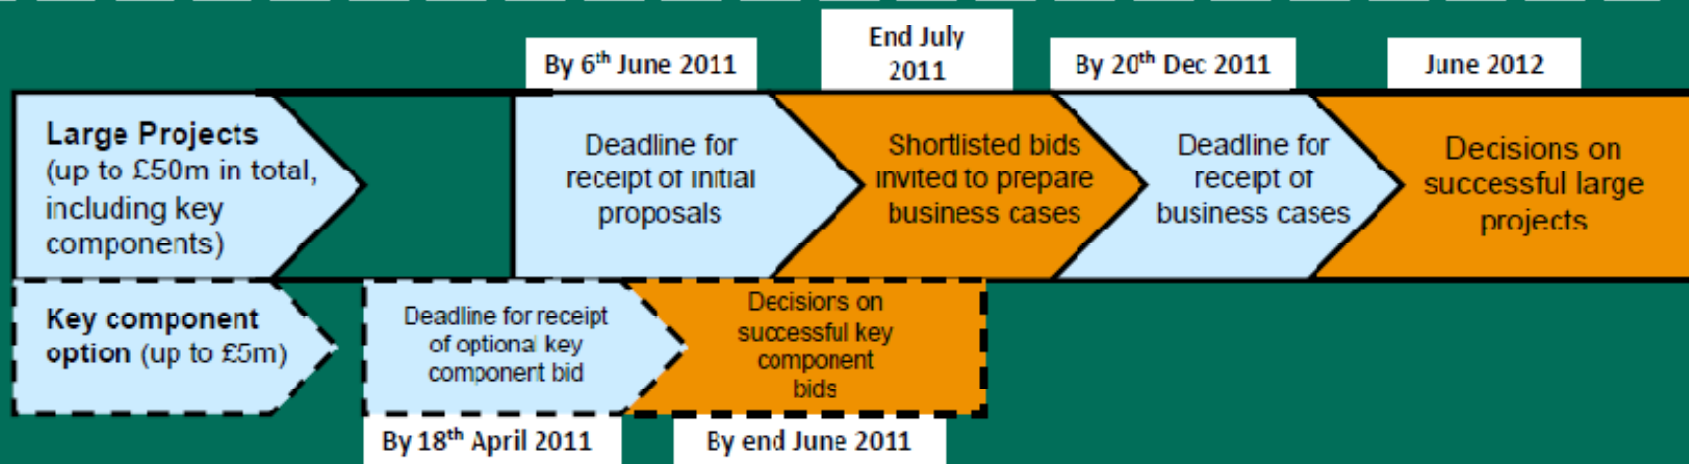

Bidding options for transport authorities

Small projects

Large projects

Tranche 1 overview

- 73 bids
- 39 bids are awarded a total of £155m
- high rate of success for ITAs

Factors apparently common to successful bids include:

- replication of demonstrably effective intervention
- joined-up-ness in delivery
- geographically focused delivery

Tranche 1 Sustrans' perspective

- 31 approved bids cite Sustrans as a delivery partner
- Some projects cited in bids are Sustrans 'owned' e.g. Bike It
- Ambiguity for other projects, e.g. PTP
- Uncertainty around partnershiping, commissioning and tendering

LTP3 review: key recommendations

- Threshold levels of investment in smarter travel choices should be achieved
- Climate change strategies to ensure that Government targets for cutting carbon emissions are met
- Effective evaluation to inform cost-effective use of future funding and maximise accountability to local communities

A photograph of two young girls riding bicycles on a paved path in a park. The girl in the foreground is wearing a colorful striped shirt and a pink helmet, smiling broadly. The girl behind her is wearing a brown jacket and a purple helmet, also smiling. The path is surrounded by lush green grass and trees, with sunlight filtering through the leaves.
